## President's message

### Where are we? Who are they?

These are who questions that do not reveal a thing about the content of the present article, but on the other hand probably aroused your curiosity. I know that you are presently in the intense process of memorizing and understanding in order to be able to confront to the best of your abilities your upcoming exams which are right around the corner. This is why I wanted to get your attention so you could take the time to relax and enjoy the CAPSIL, the last one before the beginning of the new school year.

#### Where are we?

Students who were able to attend PDW at one point or another during their pharmaceutical studies have had the opportunity to notice the astounding absence of the students who sit on the CAPSI general council during the conferences and all other social or sporting events during congress. And suddenly WHIZZ! They reappear for the closing banquet. What are we doing? Members on the CAPSI general council usually let loose during pre-congress, knowing that the actual PDW will end up being a series of day-long meetings.

We do our best to make ourselves visible during congress by communicating prior to PDW via e-mail and by organizing (through a sponsorship by Astra), three videoconferences per year so as to diminish our workload and render our meetings more efficient during PDW. However, the more we get a chance to meet, the more projects stem out of our association in order to better represent you and also increase your member privileges. What do we talk about? Topics are so numerous and broad to discuss them in these lines. However, reading the CAPSIL and discussing with one of the general council members should make you better understand the purpose of our meetings during PDW. Mike Sullivan, our president elect, would like to increase CAPSI visibility during the following PDWs and I am convinced that he will reach his goal and maintain the council's necessary yearly workload.

#### Who are they?

Indeed, what is an CAPSI Honorary Life Member (HLM)? This is what
